

MAINTAIN YOUR BOAT...

- Regularly scrub your decks with fresh water and a brush to reduce the need to use heavy cleaners.
- Try to do large cleaning and maintenance jobs while the boat is out of the water.
- Ask your marina or underwater diver to recycle used zincs.
- Use a hard (not abrasive) anti-fouling paint if you plan on scrubbing the boat bottom while in the water.

The BoatU.S. Foundation for Boating Safety and Clean Water is a national nonprofit 501(c)(3) organization that creates education and outreach campaigns, researches issues and products, and helps boaters learn specific actions they can take to be safer and better stewards of the environment while boating.

21 Steps...

...to make your boating waters cleaner

STASH YOUR TRASH...

- Reduce the amount of packaging and plastic you take aboard.
- Put a sturdy trash container on your boat.
- Obey the law – always keep plastic garbage on the boat for onshore disposal or recycling. Keep all trash on board while boating in inland and coastal waters.
- Establish a boat rule that no trash gets thrown overboard – even cigarette butts.
- Leave the water and marina cleaner than you found it – carefully pick up trash left by others.

THE SCOOP ON POOP...

- Use onshore restrooms before leaving shore.
- Obey the law – keep untreated raw sewage out of all coastal and inland waters.
- If your boat has a head, equip it with a USCG Approved Marine Sanitation Device: Type I, II, or III.
- To find a pumpout or dump station, or report a broken pumpout call 1-800-ASK-FISH.

STOP THE DROPS...

- Know how much your fuel tanks hold, and don't top off!
- Make sure anyone fueling the boat knows which deck fill is for fuel.
- Use oil absorbent pads to catch drips while handling the fuel nozzle between the dock and the boat.
- Fill up your trailerboat's gas tanks while the boat is on the trailer, not in the water.

SO MANY FISH, SO LITTLE TIME...

- Keep only those fish that you will eat today.
- Practice catch and release techniques to insure the survival of those fish you toss back.
- Use circle hooks.
- Consider joining a tag and release program that provides long term data to fisheries managers.
